DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18 and 42-49, drawn to a magnet assembly arrangement, classified in class 335, subclass 295.
 - II. Claims 25-35, drawn to a magnetic field design, classified in class 335, subclass 299.
 - III. Claims 50-64, drawn to a shimming ring for an MRI system, classified in class 335, subclass 216.
 - IV. Claims 19-24, drawn to a method of analyzing an RF field, classified in class 324, subclass 318.
 - V. Claims 36-41, drawn to a method of making an MRI device, classified in class 29, subclass 602.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions IV-V and I-III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the magnet structure can be preassembled.

Art Unit: 2832

3. Inventions I and II-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a magnet arrangement not using the field design of II or the shimming of III, invention II has separate utility such as a field design not using the magnet arrangement of I or the shimming of III and invention III has separate utility such as a shimming arrangement not using the magnet arrangement of I or the of field design of II. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 2832

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
